PRELIMINARY DESIGN PROPOSAL

WATER QUALITY REPORT

JUNE 2017, CITY OF CONTOSO

The City of Contoso's water comes from the Tailspin River and the south fork of the Woodgrove River. The water is purchased through Southridge Water Alliance (Southridge), which purchases its water from Bellows Public Utilities. Southridge also owns Lake Lamna, which can serve as a future source of water if needed.

Southridge was formed in 1993 to provide a reliable source of water to local public in the region. In addition to Contoso, members include Fabrikam, Adatum, IntraData, Nod, the Northwind Plateau, and VanAndel Water and Sewer Districts. Each member has a voice in determining its community's future by ensuring the availability of safe and reliable drinking water. As an organization, Southridge also works closely with all water providers in the Central Wingtip region to utilize all available water before another source is developed. This ensures that water will be available to the region for the future and in case of an emergency.

Planning for water takes decades. That's why Contoso and Southridge are planning now for the future. When you turn on the tap at home or at work for a drink of clean, safe, and reliable water, it will be there today and tomorrow.
